

CACP PARTNERSHIP PROGRAM

PARTNERSHIP PROGRAM

The Colorado Association of Chiefs of Police offers a collective voice for Colorado law enforcement leaders who continue to do the right thing by providing contemporary policing to our respective and collective communities, advocating for overall community safety, and protecting the rights of all.

The Colorado Association of Chiefs of Police Partnership Program is designed to create partnerships with organizations that provide products and services to law enforcement professionals across the state. The goal of the program is to provide the members of CACP with the tools, services, and resources they need to enhance the work they are doing in their communities as well as provide our partners with more visibility and access to our valued members.

The program is designed to provide various levels of participation and promotion that best fits each organization's goals in partnering with CACP. Our goal is to promote our partner organizations to our members, but also to the entire law enforcement community and the general public.

All partnerships are subject to approval by the CACP Board of Directors.
